Career & Technical Education Accountability and Evaluation Overview
Classification of Career & Technical Education Programs of Study
Perkins Core Indicators of Performance
SECTION I - INTRODUCTION

Delaware Career & Technical Education Vision, Mission, and Core Values

The Delaware Department of Education (DDOE) is committed to serving every student and ensuring that all children are career and college ready. This expectation has shaped extensive school reform, including the alignment of academic and technical instruction within a comprehensive model of Career and Technical Education (CTE) that reflects the needs of our economy and creates a systemic process for career preparation. This document will serve as a guide to support the implementation and continuous improvement of high-quality CTE programs of study across Delaware’s secondary and post-secondary education system.

Delaware Department of Education
Career & Technical Education Core Values

Value & Responsibility – We strive to continuously improve all aspects of our work and create value for our customers, stakeholders, and students.

Shared Leadership & Accountability – We model leadership by taking actions that are ethical and reasonable to create shared accountability amongst stakeholders.

Collaboration & Expectation – We value the input and contribution of all stakeholders and work collaboratively to exceed expectations.

Communication & Public Responsibility – We communicate through clear and concise methods to engage the public and accelerate our work.

Career & Technical Education Theory of Action

If students participate in Career & Technical Education programs that are driven by the economy, developed in partnership with relevant stakeholders, provide early career and college experiences, as well as connect academic and career success measures ...

then students will engage in learning to master academic, technical, and career skills that prepare them for high school graduation, post-secondary education, and competitive employment in high-skill, high-wage, high-demand careers.
SECTION I - INTRODUCTION

The Delaware Department of Education’s Teaching and Learning Branch has defined a model of career preparation that includes a state-led effort in Career and Technical Education (CTE) and the development of statewide CTE programs of study in demand-driven occupations. Each CTE program of study seamlessly aligns academic and technical instruction to meet the prerequisite expectations of employers and ensures that every child has the opportunity to continue his or her education and seek career success. This work is guided by three key principles and the belief that CTE programs of study:

1. **Prepare students for career success and post-secondary education.**

   The terms “career ready” and “college ready” are synonymous. To earn a livable wage in today’s economy, all students must possess a credential beyond a high school diploma and be prepared to continue their education in the form of two- and four-year college or university, certification programs, apprenticeship, formal job training, or military service. CTE programs of study align academic and technical knowledge at the secondary and post-secondary levels by creating multiple entry and exit points for students to pursue a career and continue their education. Students who complete a CTE program of study have the opportunity to earn an industry recognized credential and continue their education while simultaneously engaging with employers to familiarize themselves with the culture of work.

2. **Align with workforce needs and are developed in partnership with relevant stakeholders.**

   A dynamic workforce development system begins in the K-12 setting and involves established relationships with state agencies, service providers, business representatives, and institutions of higher education. These partners play a vital role in aligning education and training programs to ensure that students and adults can move efficiently into employment. The DDOE partners with a variety of stakeholders, including business associations and institutions of higher education, to continuously improve Delaware’s career preparation system and to guide the development and implementation of CTE programs of study that are responsive to the changing workforce needs. CTE programs of study establish a direct link between the public education system, post-secondary education, and changes in regional employment demand and supply.

3. **Improve student achievement by connecting academic and career success measures.**

   Programs of study measure student achievement in academic and technical areas and promote employability skills. They produce higher levels of student achievement by defining a rigorous technical and academic course sequence at the secondary and post-secondary levels that relates to a student’s career aspirations. Further, CTE programs of study provide a context for students to apply knowledge and career-ready practices through project and problem-based learning that is authentic and reflects real-world application. The DDOE, local education agencies, and post-secondary institutions collect and use these data to drive a process of continuous program improvement, including making decisions regarding the viability of existing programs. State and local outcome data serve as a means of benchmarking program of study performance, closing achievement gaps, and ensuring every student becomes career and college ready.
SECTION II – FISCAL POLICY

Career & Technical Education Federal and State Funds Overview

The Delaware Department of Education (DDOE) has developed the following fiscal guidance in accordance with the Carl D. Perkins Career and Technical Education Act of 2006 and Delaware Administrative Code [14 DE Admin. Code 525] for Career and Technical Education (CTE) (see Appendix A). Local education agencies (LEAs) and post-secondary institutions are encouraged to use this guidance when planning for the use of both federal (Perkins) and state (509) funds to support the development, implementation, and continuous improvement of CTE programs of study (POS).

Federal funds that support Career and Technical Education (CTE) are allocated through the Carl D. Perkins Act of 2006 (Perkins) to an eligible agency, i.e. Delaware State Board of Education, which delegates the distribution of funds to the Delaware Department of Education. The state allotment determines the amount of funding each state will receive in a fiscal year. The majority of federal Perkins funds are used to support eligible recipients and institutions (local education agencies and post-secondary institutions) through the within-state allocation that is defined in the Delaware State Plan for Career and Technical Education (see Appendix A). The state plan stipulates how the DDOE will allocate Perkins funds between state and local activities and the amount of funding that will be provided to secondary and post-secondary recipients. The state plan also represents an agreement between the state and the federal government to assure the administration of CTE programs is consistent with state goals, policies and objectives as well as the Perkins law.

Perkins funds must be used by eligible recipients and institutions to implement and improve CTE programs of study and to provide or improve service(s) to students and/or adults; funds should not be used to maintain existing programs. Once the required activities under Perkins have been carried out, the eligible recipient may apply funds to permissive activities. Fiscal guidelines for the required use of funds, permissive use of funds, and non-permissive use of funds are provided in the Fiscal Guidelines section of this document.

Eligible recipients and institutions are encouraged to contact the DDOE’s CTE & STEM policy advisor (see Appendix B) for technical assistance should staff wish to discuss the use of federal or state funds for CTE program of study development, implementation, and/or continuous improvement.

Carl D. Perkins Career and Technical Act of 2006

The Carl D. Perkins Career and Technical Education Act of 2006 is designed to improve the academic and technical skills of career and technical education students. The federal law integrates secondary and post-secondary education systems through an aligned sequence of courses or programs of study (POS). The overarching purpose of the Perkins Act is to:

1. Collaborate with state efforts to develop rigorous standards that aid student preparation for high-skill, high-wage, or high-demand occupations;
2. Promote integration of rigorous CTE instruction that links secondary and post-secondary education opportunities;
3. Increase state and local flexibility in providing services and activities designed to develop, implement, and improve career and technical education;
SECTION II – FISCAL POLICY

4. Conduct and disseminate national research on best practices that improve career and technical education programs, services, and activities;
5. Provide technical assistance that improves the quality of CTE for teachers, faculty, administrators, and counselors;
6. Support partnerships among secondary schools, post-secondary institutions, local workforce development boards, business and industry partners, and workforce intermediaries; and
7. Provide individuals with opportunities to develop academic and technical knowledge and skills.

Perkins funds are allocated to the DDOE for the improvement and expansion of career and technical education and the improvement of student academic and technical performance. The DDOE then allocates a percentage of these funds to eligible recipients and institutions. For more information, please view the full text of the Carl D. Perkins Career and Technical Education Act of 2006 (see Appendix A).

State Allotment and Distribution of Funds

The state allotment refers to the amount each state receives from the federal appropriation. These funds are distributed to DDOE through the basic state grant (see Perkins Section 111).

The within-state allocation refers to the method by which the state allocates Perkins funding between state and local activities (see Perkins Section 112). Perkins requires that at least 85% of available funds be allocated to support eligible institutions and recipients. Eligible institutions (see Perkins Section 3(13)) are defined as public or nonprofit private institutions of higher education that offer career and technical education courses that lead to technical skill proficiency, industry-recognized credentials, certificates, or degrees; local educational agencies providing education at the post-secondary level; area career and technical education schools providing education at the post-secondary level; educational service agencies; or a consortium of two (2) or more of the entities described above. Eligible recipients (see Perkins Section 3(14)) are defined as local education agencies, public charter schools, area career and technical schools, educational service agencies, or a consortium eligible to receive assistance under Sections 131 of the Perkins law; or eligible institutions or a consortium or eligible institutions eligible to receive assistance under Section 132 of the Perkins law.

The DDOE may reserve up to 10% of the amount distributed to eligible recipients and institutions under a competitive funding structure. These reserve funds are distributed annually through the DDOE CTE Innovation Grant (see Appendix A) to LEAs that meet one of the following requirements: (1) areas that are rural; (2) areas with high percentages of CTE students; or (3) areas with high numbers of CTE
SECTION II – FISCAL POLICY

students. The remaining 75% of local funds are divided between secondary programs (85%) and post-secondary programs (15%).

Up to 10% of the remaining state funds are set aside for state leadership activities, and up to 5% is reserved for state administrative activities. Of the 10% reserved for state leadership, the DDOE allocates up to 1% to serve individuals in state institutions, such as state correctional institutions and institutions that serve individuals with disabilities, and sets aside a minimum of $60,000 to prepare individuals for nontraditional occupations. The DDOE matches, on a dollar-for-dollar basis, the funds reserved for state administration from non-federal sources.

State Board of Education

Section 121 of the Perkins law details the responsibilities of the eligible agency to develop, submit, and implement the Delaware State Plan for CTE (see Appendix A). The Delaware State Board of Education (SBE) serves as the eligible agency and administers the Perkins program through the DDOE.

The SBE and DDOE:

- Coordinate the development, submission and implementation of the state plan, and evaluation of programs, services and activities carried out in Title I of Perkins. This also includes preparation for nontraditional fields;
- Consult with the governor and other agencies, groups, and individuals. This includes parents, students, teachers, teacher and faculty preparation programs, business representatives, labor organizations, eligible recipients and institutions, state and local officials, and local program administrators;
- Convene meetings as an eligible agency at least four times a year; and
- Adopt procedures to coordinate with the state workforce development board and provides a listing of all school dropout, post-secondary, and adult programs assisted under Perkins.

State Plan and Annual Reporting

States seeking funding through the Perkins law must submit a six-year plan to the U.S. Secretary of Education (see Perkins Section 122). The Delaware State Plan for CTE (see Appendix A) was developed in collaboration with academic and career and technical education teachers, school counselors, and administrators; eligible recipients and institutions at the secondary and post-secondary levels; charter school authorizers and organizers consistent with state law; parents and students; other institutions of higher education; interested community members (including community organizations); representatives of special populations; representatives of business and industry; and representatives of labor organizations.

Annually, the SBE vets revisions through public comment and submits updates to the state plan, as needed. This work is also part of Delaware’s Combined State Plan under the Workforce Innovation and Opportunity Act, which reflects a state-led effort in CTE and the alignment of secondary and post-secondary (CTE) programs to the larger career pathway system.

Annually, the DDOE submits a Consolidated Annual Report (CAR) (see Appendix A), to the U.S. Secretary of Education outlining the state’s progress in improving the state system of CTE and achieving the
SECTION II – FISCAL POLICY

performance levels for the core indicators of progress. The CAR disaggregates activities carried out by the eligible agency and includes data for each indicator of performance, including students in special population categories described in the law, as well as gender, race, and ethnicity. Data is stored in the DDOE EdInsight Dashboard (see Appendix A).

State Improvement Plan
If the DDOE fails to meet at least 90% of an agreed upon performance level for any indicator of performance, it must develop and implement an improvement plan (see Perkins Section 123). Special consideration is also given to performance gaps between population subgroups. This plan must be developed and implemented during the first program year after the performance level was not met. Federal funds may be withheld if the DDOE fails to implement a required improvement plan; improvement is not made within one year of implementing the improvement plan; or 90% of a performance level is not met for the same performance indicator three years in a row.

Distribution of Perkins Funds
Of the 85% allocated for local funds, the formula for distribution of funds to the secondary level is as follows (see Perkins Section 131):

- 30% based on the number of 5- to 17-year-olds who reside in the school district served by such LEA for the preceding fiscal year; and
- 70% based on the number of 5- to 17-year-olds who reside in the school district served by such LEA and are from families below the poverty level for the preceding fiscal year.

Each eligible recipient must qualify for a minimum grant of $15,000 to receive funding under this formula (see Perkins Section 131). If an eligible recipient at the secondary level does not qualify for the minimum grant amount, the eligible recipient may enter into a consortium. A consortium is defined as a cooperative agreement between area CTE schools or educational service agencies to operate programs that are of sufficient size, scope, and quality. Funds distributed to a consortium must be used for purposes and programs that are mutually beneficial to all members of the consortium and cannot be reallocated to individual members.

The formula for distribution of funds to post-secondary education programs is based on the number of Pell Grant recipients who attend the post-secondary institution and meet the Perkins requirements (see Perkins Section 132) or are enrolled in other eligible institutions as defined in the Delaware State Plan for CTE (see Appendix A). The minimum allocation for post-secondary eligible institutions is $50,000. If an eligible recipient at the post-secondary level does not meet the minimum allocation or wishes to collaborate with other eligible institutions, a consortium can be formed (see Perkins Section 132). Funds distributed to the consortium must be used for the purposes and programs that are mutually beneficial to all members of the consortium and cannot be reallocated to individual members.

Required Uses of Perkins Funds
The Perkins law requires that federal funds are allocated to improve CTE POS and promote continuous improvement against core indicators of performance. Perkins funds received by eligible recipients and institutions must be used to implement and improve career and technical programs or improve services to students and adults. Eligible recipients and institutions must satisfy the Perkins required activities
SECTION II – FISCAL POLICY

before applying funds for permissive activities (see Perkins Section 135b). Perkins funds may not be used for daily operational costs. Eligible recipients and institutions that receive Perkins funds must carry out the nine activities under the Required Uses of Funds (see Appendix C) using Perkins or other funding sources (federal, state, or local):

1. Strengthen the academic and career and technical skills of students participating in career and technical education programs, by strengthening the academic and career and technical education components of such programs through the integration of academics with career and technical education programs through a coherent sequence of courses, such as career and technical programs of study described in section 122(c)(1)(A), to ensure:
   a. Learning in the core academic subjects; and
   b. Gaining knowledge in the career and technical education subjects;

2. Link career and technical education at the secondary level and career and technical education at the post-secondary level, including by offering the relevant elements of not less than 1 career and technical program of study described in Section 122(c)(1)(A);

3. Provide students with strong experience in and understanding of all aspects of an industry, which may include work-based learning experiences;

4. Develop, improve, or expand the use of technology in career and technical education, which may include:
   a. Training of career and technical education teachers, faculty, and administrators to use technology, which may include distance learning;
   b. Providing career and technical education students with the academic and career and technical skills (including the mathematics and science knowledge that provides a strong basis for such skills) that lead to entry into the technology fields; or
   c. Encouraging schools to collaborate with technology industries to offer voluntary internships and mentoring programs, including programs that improve the mathematics and science knowledge of students;

5. Provide professional development programs that are consistent with Section 122 to secondary and post-secondary teachers, faculty, administrators, and career guidance and academic counselors who are involved in integrated career and technical education programs, which may include:
   a. Providing in-service and pre-service training on effective:
      • Integration and use of challenging academic and career and technical education provided jointly with academic teachers to the extent practicable;
      • Instructional skills based on research that includes promising practices;
      • Practice to improve parental and community involvement; and
      • Use of scientifically-based research and data to improve instruction;
   b. Supporting education programs for teachers of career and technical education in public schools and other public school personnel who are involved in the direct delivery of educational services to career and technical education students, to ensure that such teachers and personnel stay current with all aspects of an industry;
   c. Offering internship programs that provide relevant business experience; and
   d. Providing programs designed to train teachers specifically in the effective use and application of technology to improve instruction;
SECTION II – FISCAL POLICY

6. Develop and implement evaluations of the career and technical education programs carried out with funds under this title, including an assessment of how the needs of special populations are being met;

7. Initiate, improve, expand, and modernize quality career and technical education programs, including relevant technology;

8. Provide services and activities that are of sufficient size, scope, and quality to be effective; and

9. Provide activities to prepare special populations, including single parents and displaced homemakers who are enrolled in career and technical education programs, for high skill, high wage, or high demand occupations that will lead to self-sufficiency.

Permissive Uses of Perkins Funds

Once eligible recipients and institutions have satisfied the required Perkins activities (see Perkins Section 135b), the remaining funds may be used for activities under the permissive use category (see Perkins Section 135c). Activities in the permissive use category may expand the capability of the eligible recipient to improve the career and technical program. See the Fiscal Guidelines section of this document for additional information. Examples of permissive uses of Perkins funds are provided (see Appendix D).

Non-Permissive Use of Funds

Eligible recipients and institutions that receive Perkins funds acknowledge that there are non-permissive use of funds. Examples of non-permissive use of Perkins funds are provided (see Appendix D).

Carl D. Perkins Fiscal Guidance

Perkins funds must be used to improve and expand CTE programs and/or services and to improve student technical and academic performance. Perkins funds cannot be used to maintain CTE programs or to supplant state or local funding sources, but may be used to supplement new program initiatives. All allocations are approved through the DDOE Consolidated Grant Application (CGA) process (see Appendix A). The following guidelines are intended to clarify required, permissive, and non-permissive uses of funds with regard to the intent and purpose of the Carl D. Perkins Act of 2006.

General Guidelines

The following must be considered for both required and permissive uses of funds. These guiding principles include supplanting vs. supplementing, the administrative cap, funding limitations, equipment and property records, and procurement procedures.

1. Supplant vs. Supplement: Grant recipients must monitor expenditures to assure that federal funds do not supplant the established requirements of the eligible recipient. Supplanting occurs when federal funds are used to support programs and activities previously expended through local or state funds (see Perkins Section 311a) to provide services that:
   - Are required of local recipients to make available under other federal, state or local laws; or
   - Pay for expenses that the recipient delivered previously with state or local funds.

2. Administrative Cap: Perkins funds used for administrative purposes may not exceed 5% of the total grant award. Services provided using administration funds must support administration of the state plan and records are required to document the recipient’s time and effort (see Perkins...
SECTION II – FISCAL POLICY

Section 135d). Consideration should be given to the supplanting guidelines to determine if the service provided has been, or should be, provided by the eligible recipient.

3. Three-year Funding Limitation: Perkins funds may be used to support the development and implementation of a new CTE POS for up to three (3) consecutive years. Funding sources for sustaining and maintaining the POS must be identified prior to the allocation of Perkins funds for these purposes through the DDOE CGA.

4. Equipment for POS Startup or Enhancement: All Perkins allocations must be approved through the DDOE CGA. The eligible recipient must have written policies and procedures in place for approved equipment purchases to:
   - Maintain property (inventory) records;
   - Conduct physical inventories;
   - Implement control systems to prevent loss, damage, or theft;
   - Maintain property; and
   - Sell or dispose of property.

   In addition, property records for approved equipment (items that cost over $5,000 per unit and have a useful life of over one year) must be in place and include the following:
   - Description of the equipment;
   - Serial number or other identification number;
   - Funding source;
   - Acquisition date and cost;
   - Location, use, and condition of equipment;
   - Ultimate deposition data; and
   - Date of last physical inventory.

5. Procurement of equipment must be documented by the eligible recipient to:
   - Ensure vendors providing services have not been disbarred or suspended according to the System for Award Management (see Appendix A);
   - Confirm formal bidding procedures are followed for material and non-professional services purchases to include three (3) written quotes – one of which should be from a minority/women-owned business for purchases $10,000 - $24,999 and a formal bid for purchases $25,000 and over, a listing can be found in the Directory of Certified Businesses (see Appendix A);
   - Ensure formal RFP process is followed for professional services purchases of $50,000 and over; and
   - Confirm written documentation is on file citing the existence of a sole source condition including the specific efforts made to determine the availability of any other source and an explanation of the procurement need.

If equipment is designated for use by both state-approved CTE programs and other purposes, the eligible recipient must maintain documentation to assure that the cost of the purchase and maintenance of such equipment is proportionately allocated using both Perkins and other funds.

Special Rules for Perkins Funds
Perkins funds not expended within the academic year for which they are provided must be returned to the DDOE for redistribution to eligible recipients and institutions. The DDOE is required to redistribute
SECTION II – FISCAL POLICY

such amounts during that same academic year or in combination with the new fiscal allocation during the next academic year. For purpose of redistribution of funds, the Perkins academic year is defined as September to September annually to align with the annual DDOE Consolidated Grant Application process (see Appendix A). All Perkins funds must therefore be obligated by September 30 and liquidated by November 30 each fiscal year, giving the eligible recipient a 15-month administration which includes a 12- month encumbrance plus three-month liquidation period (see Perkins Section 133b).

The DDOE will contact eligible recipients and institutions that do not liquidate funds within the academic year. No less than 85% of the recuperated funds will be redistributed to eligible recipients and institutions and an updated Sub-Grant Award Notice (SAN) (see Appendix A) form provided. A Subgrantee Amendment Request form (see Appendix A) will be provided should the recuperated funds exceed 15% or $5,000 (whichever is greater) of the original budget.

State Career and Technical Education Funds (509)
In 1970 the 125th General Assembly (see Appendix A) provided funding for occupational-vocational (CTE) units with a multiplier of one (1), two (2), or three (3) times the amount of non-CTE units through House Bill 509 (see Appendix A). State funds that support CTE are commonly referred to as “509” funds based on the title of this legislation.

Local education agencies meeting the provisions of the Perkins Act and Delaware Administrative Code [14 DE Admin. Code 525] (see Appendix A) receive state “509” funds as part of the school system’s annual allocation. In addition to meeting the requirements within the Delaware State Plan for CTE (see Appendix A), Delaware Administrative Code [14 DE Admin. Code 525] requires that all CTE programs:

1. Have DDOE approval before implementation;
2. Adequately fund, support, and sustain CTE programs of study;
3. Ensure all teachers are certified and meet the certification requirements for administering end of pathway assessments in the CTE program area in which they teach;
4. Make provisions for meeting the unique needs of all students;
5. Establish and maintain an active CTE advisory committee which includes labor and management personnel to assist in the development and operation of the program;
6. Use Department of Labor market projections to determine the need for new and continuing CTE programs; and
7. Assess occupational needs and the availability of placement and employment opportunities for program completers with input from the local CTE program advisory committee.

Distribution of State Funds
The Delaware unit system for funding schools is based on Title 14, Chapter 17 of Delaware Code (see Appendix A). LEAs implementing at least one state-approved POS receive state CTE funds based on September 30 enrollment and occupational-vocational unit (CTE) allotment. Delaware Code [14 Del. C. §1702(a)] requires that appropriations for the support, maintenance, and operation of Delaware schools fall under three (3) divisions:

1. Division I includes state appropriations designated for the purpose of paying salaries;
SECTION II – FISCAL POLICY

2. Division II includes state appropriations for all other school costs and energy, except those for debt service and the transportation of students; and

3. Division III includes state appropriations for educational advancement.

Division I Funds
Delaware Code [14 Del.C. §1703(g)] defines an occupational-vocational unit (CTE) to mean 27,000 pupil minutes per week for comprehensive or charter school districts; however, units for students enrolled in technical school districts shall be counted on the basis of one (1) unit for each thirty (30) students enrolled. In addition, each eligible LEA may hire a CTE teacher for an additional fifteen (15) days for participation in program development and oversight of summer CTE cooperative programs. These CTE teachers are entitled to payment of the state share of salaries according to the guidelines found in Delaware Code [14 Del.C. §1703(j)]. AgriScience teachers may be employed for 12 months and paid in accordance with Delaware Code [14 Del.C. §1305]. These CTE teachers are entitled to payment of the state share of salaries according to the guidelines found in Delaware Code [14 Del.C. §1321(h)]. Student enrollment and unit computation reporting requirements and preparation guidelines are available through the DDOE September 30th Enrollment and Unit Allotment Regulations (see Appendix A).

Division II Funds
The funds appropriated to each LEA for expenses included in CTE Division II (Division II – Voc AOC) are determined by providing a sum for each unit of students for the purchase of textbooks, furniture, other classroom equipment, as well as consumable materials and supplies needed to maintain the CTE POS. All purchases made using state funds must adhere to the guidelines found in the Delaware Budget and Accounting Policy Manual. The funds appropriated to each district for expenses included in Division II – Voc AOC are based upon each CTE unit as defined above and are allocated at either one (Level 1), two (Level 2), or three (Level 3) times the amount determined for each non-CTE unit.

In 2000, Senate Bill 385 (see Appendix A) stipulated that at least 90% of the Division II – Voc AOC funds, with the exception of Division II-Energy funds, must be allocated to the school that generates these funds and expended to support the state approved CTE POS at that school. Each LEA, with the exception of charter schools, must establish line item accounts for Division II – Voc AOC funds. These funds are in addition to the regularly generated units and all other financial resources normally allocated to each school through Delaware Code [14 Del.C. §1706]. LEAs may request a waiver of the 90% requirement subject to the approval of the Executive Director of the Delaware Advisory Council on Career and Technical Education, the Secretary of Education, and the Controller General. Waiver requests must be submitted to the Secretary of Education by November 16 of each year.

The DDOE uses the following criteria to determine the level of funding (Level 1, Level 2, or Level 3) for each CTE course within a state-approved CTE program of study (POS):
SECTION II – FISCAL POLICY

- Level 1 courses require minimal fiscal resources to maintain program quality and meet two or fewer of the criteria above. Any course not aligned with the DDOE Policies and Procedures for CTE Programs of Study (see Appendix A) will receive Level 1 funding.
- Level 2 courses require moderate fiscal resources and meet three of the criteria above.
- Level 3 courses are material intensive and require a significant investment to maintain program quality. These courses meet four or more of the criteria above.

Division III Funds
Any school district that provides funds for local taxation for current operating expenses in excess of the basic state appropriation is eligible for Division III equalization state funds on a matching basis via Delaware Code [14 Del.C. §1707]. Charter schools are also eligible for Division III equalization funds [14 Del.C. §509]. Division III funds supplement funds appropriated under Division I and Division II for the purpose of advancing education beyond the level authorized through the basic appropriation. The Delaware Secretary of Education appoints a committee to annually review and make recommendations on the Division III equalization formula. This committee includes at minimum: a representative of the State Board of Education; a representative from the Governor’s Office designated by the governor; at least one member each from the State House of Representatives and the State Senate designated by the Speaker of the House and the President Pro Tempore of the Senate, respectively; the Secretary of Finance or the secretary's designee; the director of the Office of Management and Budget or the director's designee; the controller general or the controller general’s designee; a representative of the state teachers’ union designated by that organization; and at least three representatives of the local school districts, one from each county.
SECTION II – FISCAL POLICY

CTE Unit Count Determination
Delaware Administrative Code [14 DE Admin. Code 701] allows for a maximum of 900 minutes of career and technical education time per week, per student, to be credited toward the CTE unit determination in comprehensive, charter, and technical school districts. However, CTE units are counted on the basis of one (1) unit for each thirty (30) students enrolled in technical school districts, therefore every student in a technical school district generates 900 minutes toward the CTE unit determination.

CTE Unit Count for Non-Traditional Schedules
A LEA with a nontraditional schedule (e.g., block scheduling) is credited units based on the yearly average of CTE instructional time, provided students receive the same amount of instruction they would have received under a traditional class schedule and a minimum of 300 minutes of instruction are provided per week [14 DE Admin. Code 701]. Students participating in cooperative education or work-based learning experiences as defined in Delaware Administrative Code [14 DE Admin. Code 525] will generate 60 minutes of instructional time for every 120 minutes of documented cooperative education work experience.

CTE Unit Count Deduction
Students counted in the occupational-vocational (CTE) unit of pupils are deducted from the regular unit entitlement for a comprehensive high school according to the following formula: Occupational-vocational units (OU#) multiplied by 0.5 = deductible units (DU) or (OU# * 0.5 = DU) [14 Del.C. §1703(i)]. Despite the deduction, the LEA will realize a net gain on Division I, II, and III funds for state-approved CTE programs of study.

Audit of State Funds
Random audits of state CTE funds are scheduled and conducted by the state auditor. The Delaware Secretary of Education may request an annual report from the state auditor evidencing an audit schedule of 10% of the affected schools through Delaware Code [14 Del.C. §1706].

Grants and Financial Support to Eligible Recipients and Institutions
The DDOE awards both competitive and non-competitive grants using funds from the Carl D. Perkins Career and Technical Education Improvement Act of 2006 (Perkins) and state funds made available to support Adult Trade Extension and Apprenticeship Programs. For all competitive grants, a public Request for Proposal (RFP) is posted to the DDOE website which includes specific expectations and a timeline associated with each grant award (see Appendix A). Non-competitive grants are issued to eligible recipients and institutions who meet a specific grant condition.

Competitive Grants
The Innovation Grant RFP, the Post-Secondary Career & Technical Education RFP, and the Corrections & Institutions Grant RFP are made available through federal Perkins funds according to the Delaware State Plan for CTE to support the development, implementation, and continuous improvement of CTE programs of study. The details of each grant are outlined in the specific RFP. Eligible recipients and institutions are required to submit a standard grant application and corresponding federal budget pages. The standard grant application and federal budget pages are reviewed by DDOE staff and grant award recipients are selected based on a formal review process. A notice of grant award and corresponding
SECTION II – FISCAL POLICY

Sub-grant Award Notice (SAN) form are sent to all eligible recipients and institutions who submit an approved grant application.

**Innovation Grant**

The Innovation Grant award is supported through the Reserve Fund under the provisions of the Carl D. Perkins Act (see Perkins Sections 112 and 135). Grants are awarded to eligible recipients for the purpose of implementing and improving CTE programs of study. About $400,000 a year will be awarded to secondary eligible recipients. The upper limit and number of final grant awards are based on the competitive nature of the RFP.

Secondary recipients (as defined in Perkins Sections 112 and 131) that meet one of the following criteria are eligible to receive funding under the Innovation Grant: rural areas; areas with a high number of career and technical students; or areas with a high percentage of career and technical students. For a list of eligible recipients please see Attachment F in the Innovation Grant RFP (see Appendix A).

There is no limit to the number of applications a secondary recipient may submit; however, secondary recipients that submit more than one application must rank each grant application based on priority. DDOE takes this rank into consideration when making decisions about final grant awards. Additionally, the DDOE reserves the right to take into consideration geographic distribution, demonstrated readiness of the agency, and plan(s) for sustainability when making decisions about final grant awards.

The Innovation Grant RFP is posted for public notice at the start of each academic year and must be submitted to the DDOE by the established deadline in mid-October. Due to the competitive nature of these grants, the deadline for applications will not be extended. Innovation Grant funds are awarded under one of four priority areas that are aligned with Section 135 of the Delaware State Plan for CTE (see Appendix A). The four priority areas outlined in the Innovation Grant are to:

1. Support the implementation of new Delaware state-model CTE Programs of Study (POS);
2. Enhance Delaware state-model CTE Programs of Study (POS);
3. Prepare students for continuing education and career success; and
4. Provide professional learning opportunities for CTE instructors, administrators, and school counselors.

**Post-Secondary Career & Technical Education Grant**

The Post-Secondary Career & Technical Education Grant award is supported through the provisions of the Carl D. Perkins Act (see Perkins Sections 132 and 133). Grants are awarded to eligible institutions for the purpose of implementing and improving CTE programs of study. Approximately $550,000 a year will be awarded representing 15% of the federal Perkins funds passed through to eligible recipients and institutions. The upper limit and number of final grant awards are based on the competitive nature of the RFP.

All grants are competitive and the final approval of awards is determined by the DDOE. The DDOE reserves the right to take into consideration geographic distribution, demonstrated readiness of the agency, and plan(s) for sustainability when making decisions about final grant awards. The Post-
SECTION II – FISCAL POLICY

Secondary Career & Technical Education RFP is posted for public notice at the start of each academic year and must be submitted to the DDOE by the established deadline. Due to the competitive nature of these grants the deadline for applications will not be extended.

**Corrections & Institutions Grant**
The Corrections & Institutions Grant award is supported through the provisions of the Carl D. Perkins Act (see Perkins Sections 112 and 124). Grants are awarded to eligible recipients and institutions for the purpose of operating CTE programs that serve individuals in state correctional institutions and institutions that serve individuals with disabilities. Approximately $20,000 a year will be awarded to eligible institutions. The upper limit and number of grant awards are based on the competitive nature of the RFP.

All grants are competitive and the final approval of awards is determined by the DDOE. The DDOE reserves the right to take into consideration geographic distribution, demonstrated readiness of the agency, and plan(s) for sustainability when making decisions about final grant awards. The Corrections and Institutions Grant RFP is posted for public notice at the start of each academic year and must be submitted to the DDOE by the established deadline. Due to the competitive nature of these grants the deadline for applications will not be extended.

**Non-Competitive Grants**
The Adult Trade Extension & Apprenticeship Grant and other non-competitive grants that are awarded by the DDOE based on the identified needs of the eligible recipient and/or the demonstrated needs of students or adults who are served. There is no set timeline to administer and award non-competitive grants. Eligible institutions are required to provide a program that is of such size, scope, and quality to bring about improvement in the quality of adult trade extension and apprenticeship programs. The final grant award is determined by the DDOE. The DDOE reserves the right to take into consideration geographic distribution, demonstrated readiness of the agency, and plan for sustainability when making decisions about final grant awards. The Adult Education & Work Force Training Grant RFP is posted for public notice at the start of each academic year and must be submitted to the DDOE by the established deadline in late-October.

**Adult Trade Extension & Apprenticeship Programs Grant**
The Adult Education & Work Force Training Grant is awarded under the provisions of the Senate Bill 255 (see Appendix A), Section 325, Adult Education & Work Force Training Grant (95-03-10). Eligible institutions are required to provide a program that is of such size, scope, and quality to bring about improvement in the quality of adult trade extension and apprenticeship programs. The final grant award is determined by the DDOE. The DDOE reserves the right to take into consideration geographic distribution, demonstrated readiness of the agency, and plan for sustainability when making decisions about final grant awards. The Adult Education & Work Force Training Grant RFP is posted for the public at the start of each academic year and must be submitted to the DDOE by the established deadline in late-October.

**Carl D. Perkins Fiscal Processes**
The DDOE will provide technical assistance to eligible recipients to efficiently apply state “509” and Perkins funds to improve the local system of CTE and create additional opportunities for students. This includes defined fiscal routines to aid in the management of federal and state funds and creation of expenditure reports to help the eligible recipient evaluate expenses and document the federal and state
SECTION II – FISCAL POLICY

Investment in the local system of CTE. This section includes detail regarding the quarterly expenditure report, amendment form, categorical and programmatic reports through the eGrants management system, and the annual federal and state financial report generated by the DDOE CTE & STEM workgroup.

Quarterly Expenditure Report and Amendment Form
At the start of each quarter, the CTE & STEM workgroup will provide each eligible recipient with an updated expense report that provides the timeline for obligation and liquidation, documents federal budget versus expenditures, the percentage of unobligated funds, and potential amendments for Perkins funds. Information for the quarterly expenditure report will be captured from Delaware’s First State Financial Accounting System (see Appendix A).

First quarter (July – September) expense reports and second quarter (October – December) expense reports will be directed to the LEA’s designated CTE director. Third quarter (January – March) expense reports and fourth quarter (April – June) expense reports will be directed to the LEA’s designated CTE director and include a courtesy copy to the LEA’s superintendent or head of school and business manager should the remaining balance exceed 50% of the total allocation. If needed, the Subgrantee Amendment Request form and instructions will also be provided (see Appendix A). Amendments are required for any programmatic change that exceeds 15% or $5,000 (whichever is greater) of an approved budget category.

Categorical and Programmatic Reports
Through the CGA approval process and administration, financial reports for Perkins can be produced using the eGrants system and First State Financials (FSF). eGrants is DDOE’s online Grants Management System and is used in the administration of federal funds. FSF is the State of Delaware’s integrated, automated accounting system.

A categorical report represents the eligible recipients budgeted expenses by account code. A programmatic report can be generated using the eGrants funding descriptions and represents budgeted expenses for the required and permissive use of funds under Perkins. Categorical and programmatic reports should be used by the eligible recipient to improve the local system of CTE, identify future expenditures, and calculate the return on investment of federal Perkins funds.

Annual Fiscal Report
At the close of each federal fiscal year, the DDOE CTE & STEM workgroup will generate an annual federal and state financial report for each eligible recipient. The report will document all Perkins money including the: approved budget by account code; percent of funds expended by account code; approved budget by funding description; list of approved amendments; additional federal grant award(s); and monies remitted. The report will also document all state CTE funds distributed to each eligible recipient by school. The annual financial report should be used by the eligible recipient to improve how funds are applied to supplement and improve the local system of CTE, which includes but is not limited to evaluation of the budget versus expenditures, management of funds at the local level, and calculation of return on investment for federal and state funds.
SECTION III – ACCOUNTABILITY POLICY

Career & Technical Education Accountability and Evaluation Overview

Perkins requires states to develop and report on a series of core indicators that set expectations for all CTE students. Delaware reports data for Perkins Performance Indicators for students enrolled in state approved CTE programs of study. The Perkins law establishes and supports a state and local accountability system designed to assess the effectiveness of eligible agencies, recipients, and institutions in achieving progress in career and technical education. Each core indicator measures a specific aspect of a CTE program of study and can be used to evaluate student achievement and/or program of study performance, provide technical assistance, identify gaps in service, and calculate return on investment.

The DDOE is required to negotiate and establish an adjusted level of performance for each Perkins core indicator on an annual basis. The final agreed-upon performance level or FAUPL is established during the negotiation process. Eligible recipients and institutions have the option to accept the DDOE performance target(s) or negotiate to reach agreement on new local adjusted levels of performance that are more applicable. This process is known as the local agreed-upon performance level or LAUPL and is negotiated during the Consolidated Grant Application (CGA) for Perkins. All performance targets must be agreed to by the eligible recipient and the DDOE through the CGA. Performance related to the Perkins core indicators require continuous improvement and are expressed in a percentage or numerical form.

If an eligible recipient fails to meet 90% of a performance target for one or more years, the eligible recipient shall develop and implement a local improvement plan to address the target. If the eligible recipient fails to meet 90% of a performance target for three consecutive years, then a portion of federal Perkins funds may be withheld or directed to address the performance shortfalls.

The DDOE’s CTE & STEM workgroup will provide technical assistance to eligible recipients and institutions as needed through a multi-tiered system of accountability and monitoring. Eligible recipients and institutions are encouraged to contact the DDOE CTE & STEM policy advisor (see Appendix B) for technical assistance should the eligible recipient wish to discuss the Perkins core indicators, the LAUPL process, or the multi-tiered system of accountability and monitoring.

Classification of Career & Technical Education Programs of Study

The CTE Course Classification system is used to provide a taxonomic scheme to track, assess, and report data for CTE programs of study and career development activities. In Delaware, CTE programs of study are classified under the Career Clusters Framework® (see Appendix A), which represent an occupational coding structure that classifies related career areas called career clusters and more specific occupational groupings called career pathways. These expectations help to align occupation specific education and training programs or career pathways and assists states and LEAs to work with partnering institutions of higher education to develop programs of study or aligned educational programs that bridge secondary and post-secondary instruction. For the list of all career clusters and their related career pathways, please visit the Career Clusters Framework® (see Appendix A).

Using the Career Clusters Framework® as a method of CTE course classification allows the DDOE to align CTE programs of study with relevant labor market information (LMI) at the career cluster, the career
SECTION III – ACCOUNTABILITY POLICY

pathway, and the occupational level as designated by related Standard Occupation Codes (SOCs). LMI data at the career cluster and career pathway levels identify labor demand and supply, occupational growth, wage projections, and regional employment statistics for long-term (typically 10-year) employment projections for a specific group of occupations. LMI data at the SOC level help to identify baseline trends for employment, specialty and/or software skills, educational preferences, related experience, and industry certifications needed for hire. Such data help educators make timely changes to program offerings to match changes in regional employment demand and supply. For more information on the analysis of LMI, please see the CTE LMI Instructions & Guidance document and the CTE LMI Review document (see Appendix A). Additionally, the DDOE has created a crosswalk of career clusters and career pathways to corresponding SOCs. For additional information on SOCs visit the Bureau of Labor Statistics (see Appendix A).

The CareerClusters Framework® (see Appendix A) provides a hierarchy to classify CTE programs of study and benchmark student outcome data to close achievement gaps. The framework codes career clusters and career pathways at the national level to help states benchmark student achievement. Delaware has applied this methodology to link program of study and course level detail through an automated data collection process for public accountability and reporting. At the state and local level, CTE data are aggregated and delineated by career cluster and career pathway to provide a benchmark for student achievement. At the secondary and post-secondary level, CTE data are aggregated for local accountability. Data delineation at the school level provides for the evaluation and continuous improvement of CTE programs of study.

The chronology of career cluster, career pathway, program of study, and course level detail is defined using a course code that is assigned to each CTE program of study and corresponding course when the CTE program of study is approved. Additionally, the CTE program of study and course code is used for federal and state financial reporting, teacher certification or licensure, and program accountability. The following definitions and chart (see Appendix E) represent the CTE course classification code structure for Delaware CTE programs of study.

- **Career Cluster Name and Code:**
  Career clusters are broad occupational groupings that define a set of common knowledge and skills required to be successful in a career area. Delaware CTE programs of study are structured within one of the sixteen (16) career clusters. To review the corresponding name and code for each career cluster, please visit CareerClusters Framework® (see Appendix A).

- **Career Pathway Name and Code:**
  Career clusters are linked education and training programs for a specific occupation or occupational cluster that help students to advance through higher levels of education and employment. Delaware CTE programs of study are structured within a career pathway to connect education programs with a specific set of occupations. To review the corresponding name and code for each career pathway, please visit CareerClusters Framework® (see Appendix A).

- **Program of Study Title and Code:**
SECTION III – ACCOUNTABILITY POLICY

Programs of study represent a structured approach for delivering academic and Career & Technical Education (CTE) through an aligned sequence of courses that bridge secondary and post-secondary instruction. Delaware CTE programs of study are developed at the state or local level and include the following designations within the CTE course classification code: program of study type and program of study code. The program of study type is assigned based on the instructional level and how the program was developed and/or is administered. The program of study code is unique to each CTE program of study and is assigned by DDOE in chronological order of program approval (see Appendix E).

• Course Level Titles and Codes:
At the course level, Delaware CTE programs of study include the following designations within the CTE course classification code: course sequence code and program-level code. The Course sequence code is assigned based on the sequence of courses within the CTE program of study. For three-credit programs of study, the designation of one to three is applied. For six-credit programs of study, the designation of one to six is applied. The order in which courses are administered within a CTE program of study is defined with the CTE Program of Study Application (see Appendix A). The program level code is assigned to better identify CTE participants, concentrators, and completers. In a program of study, courses in which students could be considered a CTE concentrator are designated with a two (2) and courses in which students could be considered a CTE completer are designated with a three (3). Additionally, middle school courses are designated with a zero (0) and Early Career Experience courses are designated with a five (5).

Example below, see Appendix E for more information:

Perkins Core Indicators of Performance

Section 113 of the Perkins law establishes and supports state and local accountability systems that assess the effectiveness of DDOE and eligible recipients and institutions in achieving statewide progress and continuous improvement of goals related to career and technical education. Each Perkins core indicator is developed with input from eligible recipients and institutions and the larger community. In accordance with the Delaware State Plan for CTE, each indicator is designed to define student participation in and completion of a CTE program of study. Definitions are used to establish values for each Perkins core indicator that can be applied to the evaluation of CTE activities and identification of support and/or technical assistance.

A. Secondary Student Definitions:
These definitions are used to classify student participation in and completion of a CTE program of study.
SECTION III – ACCOUNTABILITY POLICY

Participant:
A student who has successfully completed one or more CTE courses.

Concentrator:
A student who has successfully completed 50% of the credits required to complete a state-approved CTE program of study.

Completer:
A student who has successfully completed a state-approved CTE program of study.

B. Secondary Perkins Core Indicator Definitions:
The following definitions are used to operationalize the CTE accountability system at the secondary level. Additionally, definitions and LEA performance related to the Perkins core indicators shall be used to develop a local improvement plan for Perkins and serve as a basis for negotiation of LAUPL performance targets.

- **1S1 and 1S2 – Academic Achievement in English Language Arts (ELA) & Mathematics:**
  
  Academic achievement is defined by the state in accordance with the *Every Student Succeeds Act (ESSA)*. At the high school level, the SAT assessment is used to measure ELA and mathematics proficiency.

  **1S1 Numerator:** Number of current year 12th grade CTE concentrators who were proficient on their 11th grade ESSA standardized ELA assessment.

  **1S2 Numerator:** Number of current year 12th grade CTE concentrators who were proficient on their 11th grade ESSA standardized math assessment.

  **Denominator:** Number of current year 12th grade CTE concentrators who took the 11th grade ESSA standardized ELA or math assessment.

- **2S1 – Technical Skill Attainment:**
  
  Technical skill attainment (TSA) is a measure of technical knowledge and skill proficiency developed during the CTE program of study that leads to an industry recognized credential, certificate, or license which holds value at the professional level, post-secondary level, or in an associate or baccalaureate degree program. Advanced coursework, dual enrollment, and an industry certification or state licensure are considered measures of TSA. Measures for TSA shall be defined in the application for a state-approved CTE program of study and reflective of the skills required for career success within an occupation or occupational cluster.

  **2S1 Numerator:** Number of CTE concentrators who demonstrated related technical skill attainment in a state-approved CTE program of study and left secondary education during the reporting year.

  **2S1 Denominator:** Number of CTE concentrators who left secondary education during the reporting year.
SECTION III – ACCOUNTABILITY POLICY

- **3S1 – Secondary School Completion:**
  Career and Technical Education (CTE) programs of study represent a sequence of aligned courses that pair academic and technical education to prepare students for continuing education and career success. This measure calculates the percent of students that complete a CTE program of study.

  **3S1 Numerator:** Number of CTE concentrators who successfully completed a state-approved CTE program of study and left secondary education by the end of the reporting year.

  **3S1 Denominator:** Number of CTE concentrators who left secondary education during the reporting year.

- **4S1 – CTE Student Graduation Rate:**
  The student graduation rate is defined by the state in accordance with ESSA. In Delaware, the student graduation rate includes those students who earn a high school diploma or a certificate. For each student cohort, these data are reported one year following the close of that academic year as referenced in the numerator and denominator.

  **4S1 Numerator:** Number of current year 12th grade CTE concentrators who were included as graduated by the end of the reporting year in the state’s ESSA computation of graduation rate (diploma and certificate holders).

  **4S1 Denominator:** Number of 12th grade CTE concentrators who left secondary education during the reporting year.

- **5S1 – Secondary Placement:**
  Secondary placement includes student placement in post-secondary education or advanced training, military service, or employment at an objective benchmark or six (months post-graduation. For each student cohort, these data are reported one year following the close of that academic year as referenced in the numerator and denominator.

  **5S1 Numerator:** Number of CTE concentrators who graduated in the previous reporting year and were placed in post-secondary education, employment, or the military in the last quarter (Oct - Dec) of the year they graduated.

  **5S2 Denominator:** Number of CTE concentrators who graduated in the previous reporting year.

- **6S1 & 6S2 – Non-Traditional Participation and Completion:**
  These measures focus on gender equity in CTE programs of study and are designed to increase the participation and completion rates of underrepresented gender students in non-traditional CTE programs. Non-traditional CTE programs are those programs that prepare students for occupations where less than 25% of those employed in that field are of one gender, e.g. women in engineering and men in nursing.

  **6S1 Numerator:** Number of under-represented gender CTE participants in a CTE program of
SECTION III – ACCOUNTABILITY POLICY

study that leads to employment in nontraditional fields during the reporting year.

**6S1 Denominator:** Number of CTE participants in a CTE program of study that leads to employment in nontraditional fields during the reporting year.

**6S2 Numerator:** Number of under-represented gender CTE completers in a CTE program of study that leads to employment in nontraditional fields and left secondary education during the reporting year.

**6S2 Denominator:** Number of CTE completers in a CTE program of study that leads to employment in nontraditional fields and left secondary education during the reporting year.

C. Post-secondary Student Definitions:
These definitions are used to classify student participation in and completion of a CTE program of study at the post-secondary level.

**Participant:**
A post-secondary student who is enrolled in one or more credits in any CTE program area.

**Concentrator:**
A post-secondary/adult student who: (1) completes at least 12 academic or CTE credits within a single CTE program area sequence that is comprised of 12 or more academic and technical credits and terminates in the award of an industry recognized credential, a certificate, or a degree; or (2) completes a short-term CTE program sequence of less than 12 credit units that terminates in an industry-recognized credential, a certificate, or a degree.

**Completer:**
A post-secondary/adult student who receives an industry-recognized credential, a certificate, or a degree during the reporting year.

D. Post-secondary Perkins Core Indicator Definitions:
These definitions are used to operationalize the CTE accountability system at the post-secondary level. Additionally, definitions and post-secondary institution performance related to the Perkins core indicators shall serve as a basis for negotiation of LAUPL performance targets.

- **1P1 – Technical Skill Attainment:**
  Technical skill attainment includes the attainment of challenging career and technical proficiencies, including student achievement on technical assessments that are aligned with industry-recognized standards where available and appropriate.

  **1P1 Numerator:** Number of CTE concentrators who passed technical skill assessments that are aligned with industry-recognized standards, if available and appropriate, during the reporting year.

  **1P1 Denominator:** Number of CTE concentrators who took technical skill assessments during the reporting year.
SECTION III – ACCOUNTABILITY POLICY

- **2P1 – Credential, Certificate, or Degree**
  These measures focus on student attainment of an industry-recognized credential, certificate, or degree.

  **2P1 Numerator:** Number of CTE concentrators who received an industry-recognized credential, a certificate, or a degree during the reporting year.

  **2P1 Denominator:** Number of CTE concentrators who left post-secondary education during the reporting year.

- **3P1 - Student Retention or Transfer**
  This measure focuses on student retention in post-secondary education or transfer to a baccalaureate degree program.

  **3P1 Numerator:** Number of CTE concentrators who remained enrolled in their original post-secondary institution or transferred to two- or four-year post-secondary institution during the reporting year and who were enrolled in post-secondary education in the fall of the previous reporting year.

  **3P1 Denominator:** Number of CTE concentrators who were enrolled in post-secondary education in the fall of the previous reporting year and who did not earn an industry-recognized credential, a certificate, or a degree in the previous reporting year.

- **4P1 - Student Placement**
  Post-secondary placement includes student placement in advanced training, military service, or employment at an objective benchmark or six months post-graduation. For each student cohort, these data are reported one year following the close of that academic year as referenced in the numerator and denominator.

  **4P1 Numerator:** Number of CTE concentrators who were placed or retained in employment, or placed in military service or apprenticeship programs in the second quarter following the program year in which they left post-secondary education.

  **4P1 Denominator:** Number of CTE concentrators who left post-secondary education during the reporting year.

- **5P1 & 5P2 - Nontraditional Participation and Completion**
  These measures focus on gender equity in CTE programs of study and are designed to increase the participation and completion rates of underrepresented gender students in non-traditional CTE programs. Non-traditional CTE programs are those programs that prepare students for occupations where less than 25% of those employed in that field are of one gender, e.g. women in engineering and men in nursing.
SECTION III – ACCOUNTABILITY POLICY

5P1 Numerator: Number of CTE participants from underrepresented gender groups who participated in a program that leads to employment in nontraditional fields during the reporting year.

5P1 Denominator: Number of CTE participants who participated in a program that leads to employment in nontraditional fields during the reporting year.

5P2 Numerator: Number of CTE concentrators from underrepresented gender groups who completed a program that leads to employment in nontraditional fields during the reporting year.

5P2 Denominator: Number of CTE concentrators who completed a program that leads to employment in nontraditional fields during the reporting year.

Performance Targets

Section 113 of the Perkins law establishes state and local performance measures that assess statewide progress and continuous improvement of goals related to career and technical education. These levels of performance are expressed as a percent and require continual improvement in the performance of CTE students. Annually, the U.S. Department of Education (USDOE) and the DDOE reach agreement on the adjusted levels of performance for each of the secondary and post-secondary core indicators of performance. These are considered the final agreed upon performance levels or FAUPL and are specific for each core indicator.

Eligible recipients and institutions have the option to accept the state negotiated performance levels (FAUPL) or work with the DDOE to negotiate locally agreed upon performance levels (LAUPL) that reflect unique local circumstances for each core indicator. The LAUPL is negotiated during the CGA process in the Perkins section of the eligible recipient’s local plan (see Perkins Section 134).

Improvement Plans

Eligible agencies and recipients that fail to meet at least 90% of an agreed upon performance level for any of the core indicators of performance are required to develop and implement a local improvement plan (see Perkins Section 123). This plan must be developed and implemented during the first program year after failing to meet the adjusted level of performance for any of the core indicators of performance.

If an eligible recipient fails to meet 90% of a performance target for one or more years, the eligible recipient shall develop and implement an improvement plan to address the target. If the eligible recipient fails to meet 90% of a performance target for three consecutive years, then a portion of that recipient’s federal Perkins funds may be withheld or directed to address the target. The DDOE’s CTE & STEM workgroup will provide technical assistance to eligible recipients and institutions as needed through a multi-tiered system of accountability and monitoring:

- Tier I: Monitoring visits are facilitated by the eligible recipient and the DDOE CTE staff and support the continued improvement of CTE programs of study in conjunction with Perkins and Delaware Administrative Code [14 DE Admin. Code 525].
SECTION III – ACCOUNTABILITY POLICY

- Tier II: Support is provided for the development and implementation of a local improvement plan for any eligible recipient that fails to meet 90% of a performance target for one or more years. This plan will follow the requirements of a local improvement plan and more specific technical assistance may be provided through the DDOE CTE & STEM workgroup.

- Tier III: Funds may be withheld if the eligible recipient fails to meet the same performance indicator three (3) years in a row. The DDOE CTE staff will assist in the development of a new local improvement plan, direct improvement activities, and provide additional technical assistance as needed.

State Program Improvement
If the state fails to meet at least 90% of an agreed upon performance level for an indicator of performance, it must develop and implement an improvement plan (see Perkins Section 123). Special consideration is given to performance gaps between population subgroups. This plan must be developed and implemented during the first program year after the performance level was not met. States must submit quarterly progress updates to the USDOE and the Office of Career, Technical, and Adult Education (OCTAE). Funds may be withheld if the DDOE fails to implement a required improvement plan; improvement is not made within one year of implementing the improvement plan; or 90% of a performance level is not met for the same performance indicator for three consecutive years.

Local Program Improvement
Requirements related to a local improvement plan mirror language related to state program improvement. Eligible recipients and institutions that fail to meet at least 90% of an agreed upon performance level for any core indicator of performance must submit a local improvement plan through the CGA (see Appendix A) process. This plan must be developed and implemented during the first program year after the performance level was not met. A local improvement plan must:

1. Identify the Perkins core indicators of performance that were not addressed at the 90% threshold, the eligible recipient’s current performance, and the anticipated performance or goal that will result from implementing the improvement plan;
2. Document the timeline for implementation, which includes key dates, activities, and person(s) responsible for implementation of the improvement plan;
3. Identify the funding source and/or resource allocation that is required to implement the improvement plan; and
4. Define the strategy that the eligible recipient will apply to improve the gap in performance, the identified root cause, and the demonstrated need(s) of the recipient.

An improvement plan is not required for eligible recipients and institutions that have met all negotiated performance targets. Technical assistance and/or support to help address any Perkins indicator that was not met at the 90% threshold is available by contacting the DDOE CTE & STEM Policy Advisor (see Appendix B).
SECTION III – ACCOUNTABILITY POLICY

Career & Technical Education Consolidated Grant Application Overview

Local applications for funding under the Perkins Act of 2006 must incorporate and reflect the twelve (12) required components of the local plan (Section 134) and the nine (9) required uses of funds (Section 135). This expectation has been addressed through the Consolidated Grant Application (CGA), i.e. the local application for Perkins and the local planning tools that are administered through the DDOE eGrants management system. Through the CGA process, each eligible recipient will provide an overview of the local model for CTE and include sufficient detail for the reviewer to understand the local system of CTE. Sufficient detail must be provided for each budget expense and a detailed narrative should be provided for each response in the local plan. The local plan shall cover the same period of time as the period of time applicable to the Delaware State Plan for Career and Technical Education. Eligible recipients that did not meet at least 90% of the agreed upon performance targets for any of the core indicators for Perkins described in Section 113(b)(4) of the Perkins Act are required to document their local improvement plan through the CGA. For more information, please see the Delaware State Plan for Career and Technical Education (see Appendix A).

A CGA will be submitted through the eGrants online system. For more information on the CGA process and the eGrants system for Delaware, please visit the Consolidated Grants page on the DEDOE web site (see Appendix A). Leaders at the LEA level are encouraged to contact the DDOE’s CTE & STEM policy advisor (see Appendix B) for technical assistance should they wish to discuss the CGA process, the eGrants system, or guidance in developing a local application for Perkins.

Section 1: eGrants Budget & Budget Overview

Perkins funds must be used by eligible recipients to implement and improve CTE programs of study as well as provide or improve service(s) to students and/or adults; funds should not be used to maintain existing programs or support individual students. Fiscal guidelines for Perkins (required, permissive, and non-permissive use of funds) are provided in the Fiscal Guidelines section of this document. Eligible recipients must satisfy the required activities under Perkins before applying expenses to permissive activities; however, required activities may be met using other federal, state, or local funding sources. For a list of the Perkins required use of funds and corresponding funding descriptions, please see Appendix B.

Within the Perkins application, there are two budget pages that are titled Budget and Budget Overview. The Budget page allows the user to review and enter expenses by account code. The Budget Overview page reflects each budget line item and will automatically sort expenses by account code and funding description. The eligible recipient will build a program budget by inserting line item expenses. Each line item must include specific budget detail for the recipient to manage the grant. Instructions for completing the Budget and Budget Overview pages within the DDOE eGrants system are below.

Instructions:
1. Entering and removing line item expenses:
   - Go to the “Budget” page(s);
   - Click the “modify” link next to the appropriate account code;
   - Click the “add item” link below the indirect cost calculator;
SECTION III – ACCOUNTABILITY POLICY

- Enter the appropriate budget details in the space provided (additional descriptions are below by budget section);
- Click “save” to complete the line item or “save and return” to exit the page; and
- Remove a line item by clicking “remove”.

<table>
<thead>
<tr>
<th>Budget Section</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Account Code</td>
<td>Corresponds to the DDOE categorical expense codes.</td>
</tr>
<tr>
<td>Funding Description</td>
<td>Corresponds to the required uses of funds and permissive uses of funds under Perkins and is used to document budget detail for specific program activities (see Appendix C).</td>
</tr>
<tr>
<td>Location Code</td>
<td>Used to identify the location (central office or school) where the expense will occur.</td>
</tr>
</tbody>
</table>
SECTION III – ACCOUNTABILITY POLICY

<table>
<thead>
<tr>
<th>Quantity, Cost, &amp; Line Item Total</th>
<th>Used to input the number of products or services being purchased, the cost per item, and the total cost of the line item expense.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Narrative Description</td>
<td>Should include all additional budget details, e.g. program of study title, the expense justification or outcome, and the item/service description.</td>
</tr>
</tbody>
</table>

2. Reviewing budgets details by account code, funding description, and location:
   - Go to the “Budget Overview” page;
   - Click “show unbudgeted categories” or “hide unbudgeted categories” to display budget detail by funding description. This should be used by the eligible recipient to evaluate programmatic expenses. The account codes are provided for each display to further delineate expenses; and
   - Click “filter by location” and select the appropriate school to display budget details by location code. The default “all” location includes all schools and the central office. The account codes are provided for each display to further delineate expenses.

Section 2: eGrants Core Indicators of Performance

Core indicators of performance are described in Section 113(b)(4) of the Perkins Act and the Delaware State Plan for Career and Technical Education (see Appendix A). Each eligible recipient will have the opportunity to accept the proposed state performance levels or propose performance levels that are unique to the eligible recipient. This process of negotiation is known as the locally agreed upon performance level (LAUPL). LAUPL targets for all eligible recipients will be reviewed and agreed to before the start of the program year through the CGA process.

The negotiation of performance levels reflects the upcoming academic year and will not impact the prior year or current year performance targets. Performance data from three (3) prior years are provided for the eligible recipient on the Core Indicators of Performance page in the eGrants system. Prior years’ performance data include the actual performance level and the performance target for that academic year. The current year’s performance target is also provided. Eligible recipients are required to show continuous improvement when establishing local targets to meet or exceed the state negotiated target.
SECTION III – ACCOUNTABILITY POLICY

for each core indicator. Proposed performance levels through the LAUPL must take into consideration
the following factors which are described in Section 113(b)(3) of the Perkins Act:

1. Account for factors such as the addition or deletion of programs, the demographic characteristics of
   the participants (students and/or adults), and the services or instruction to be provided;
2. Promote continuous improvement on the indicators of performance set by the DDOE;
3. Present a logical target and process for goal setting; and
4. Represent performance levels agreed upon by both the eligible recipient and the DDOE through the
   CGA process.

Local performance targets must account for past performance and promote incremental growth. A
typical calculation to establish a local performance target can be the average of the prior three years
actual performance level plus 5% of the average, or a percent deemed appropriate by the eligible
recipient. Several examples follow:

**District A:**

Prior performance average: FY15 = 38%  
FY16 = 40%  
FY17 = 42%  
Three-Year Average = 40%

Incremental growth of 5% based on three-year average: 2%

Average performance plus incremental growth: 42%

**District B:**

Prior performance average: FY15 = 33%  
FY16 = 32%  
FY17 = 28%  
Three-Year Average = 31%

Incremental growth of 5% based on three-year average: 1.5%

Average performance plus incremental growth: 32.5%

**District C:**

Prior performance average: FY15 = 22%  
FY16 = 28%  
FY17 = 16%  
Three-Year Average = 22%

Incremental growth of 5% based on three-year average: 1.1%

Average performance plus incremental growth: 23.1%
SECTION III – ACCOUNTABILITY POLICY

If an eligible recipient fails to meet a local performance target, the negotiated level may remain static for one academic year. Further, if an eligible recipient’s local performance is 95% or above, the negotiated level may remain static indefinitely. All rationale applied to the calculation of a local performance level, should be included as part of the justification. Instructions for completing the Core Indicators of Performance page within the DDOE eGrants system are below.

For those charter schools that have an approved alternative performance framework or those charter schools that have new CTE programs of study which do not yet have past performance data, the state targets should be accepted in the CGA. Charter school leaders are encouraged to contact the DDOE’s CTE & STEM policy advisor (see Appendix B) for technical assistance should the LEA wish to discuss the LAUPL process.

Instructions:
Agreeing to state targets, negotiating local targets, and the approval process:
- To accept the proposed state target, click the “check box” under the appropriate column for each core indicator accepted at the proposed state target rate;
- To negotiate a local performance target, enter the “percent” target rate under the appropriate column and related “justification” under the appropriate column for each core indicator where a local performance level is proposed;
- Once all proposed targets have been entered, click “save and go to.”

The approval process will be negotiated during the CGA administration and review. Once accepted by both the eligible recipient and the DDOE, the eligible recipient will submit the CGA application and complete the Perkins specific assurances.

Section 3: eGrants Local Plan
Eligible recipients are required to describe the local system of CTE as well as opportunities to support students and teachers. The following questions are included in the local application for Perkins. Responses to each question should provide an overview of the local delivery model for CTE programs and include sufficient detail for the reviewer to understand the local system of CTE. When responding
SECTION III – ACCOUNTABILITY POLICY

to questions that have multiple sub-questions, each response should be clear and address each stated topic. Instructions for completing the Local Plan page within the DDOE eGrants system are below.

Questions in the Local Application:
1. Describe how the CTE activities will meet State and local adjusted levels of performance that are established under Section 113.
2. Describe how the CTE programs required under Section 135(b) REQUIRED USE OF FUNDS will be carried out.
3. Describe how the eligible recipient will:
   a. Offer at least one CTE program(s) of study, Section 122(c)(1)(A);
   b. Improve the academic and technical skills of CTE students through the integration of the Common Core State Standards, the Next Generation Science Standards, and relevant CTE programs;
   c. Provide students with a strong experience in, and understanding of, all aspects of an industry; and
   d. Ensure that students who participate in CTE programs are taught challenging academic standards and enroll in rigorous academic courses.
4. Describe how comprehensive professional learning experiences (aligned to Section 122 of the Perkins Act, Delaware Administrative Code 1598, and the Delaware State Plan for CTE) will be provided for CTE educators.
5. Describe the process that will be used to evaluate and continuously improve the performance of the eligible recipient.
6. Describe how the eligible recipient will:
   a. Review CTE programs and overcome barriers that result in decreased rates of access or success for special populations as defined in Section 3(29);
   b. Provide programs that enable special populations to meet the local adjusted levels of performance;
   c. Provide activities to prepare special populations for high skill, high wage, or high demand occupations that will lead to self-sufficiency; and
   d. Ensure that individuals who are members of special populations will not be discriminated against on the basis of their status.
7. Describe strategies that will be used to promote preparation for underrepresented genders in nontraditional occupational fields.
8. Describe how career guidance and academic counseling will be provided to CTE students, which includes linkages to future education and training opportunities as well as placement in the workforce.
9. Describe efforts to improve:
   a. The recruitment and retention of CTE teachers, faculty, and school counselors, including underrepresented individuals or groups in the teaching profession; and
   b. Support the transition of industry professionals to teach CTE programs.

Instructions:
Entering responses:
• Enter text directly into the provided space or copy and paste responses to each stated question; and
SECTION III – ACCOUNTABILITY POLICY

- Click “save and go to” to record all responses in the eGrants application.

Section 4: eGrants Related Documents
All eligible recipients must include a list of Perkins Advisory Committee members in the related documents section. Representatives on the advisory committee should include, but are not limited to: CTE and academic teachers, CTE/curriculum district coordinators, school counselors, business and industry representatives, labor representatives, post-secondary partners (two- and four-year), parents, and students. The group should be reflective of the community and account for broad stakeholder engagement. A template to document this information is provided through the CGA website (see Appendix A). The file should be uploaded to the DDOE eGrants system and include the following information for each person serving on the advisory committee:

- First and last name;
- Title and affiliation/employer;
- Contact information (address, phone, email); and
- Area of representation (business/industry, secondary education, post-secondary education, community).

An improvement plan is required for eligible recipients that did not meet 90% of an agreed upon performance target for one (1) or more years per Section 113(b)(4) of the Perkins Act and the Delaware State Plan for Career and Technical Education. If the eligible recipient fails to meet 90% of a performance target for three (3) years in a row, then a portion of federal Perkins funds may be withheld or directed to address the target. A template to document this information is provided through the CGA website (see Appendix A). The file should be uploaded to the DDOE eGrants system and include the following information for each core indicator not met at the 90% threshold:

1. Identify the Perkins core indicator of performance that was not addressed at the 90% threshold, the eligible recipient’s current performance, and the anticipated performance or goal that will result from implementing the improvement plan;
SECTION III – ACCOUNTABILITY POLICY

2. Document the timeline for implementation, which includes key dates, activities, and person(s) responsible for implementation of the improvement plan;
3. Identify the funding source and/or resource allocation that is required to implement the improvement plan; and
4. Define the strategy that the eligible recipient will apply to improve the gap in performance, the identified root cause, and the demonstrated need(s) of the recipient.

Section 5: eGrants Assurances

When eligible recipients accept funds from the DDOE through the CGA process they must agree to certain obligations or assurances. These assurances require recipients to maintain and operate their local system of CTE in accordance with the Carl D. Perkins Career and Technical Education Act of 2006 and Delaware Administrative Code [14 Del.C. §525] for Career and Technical Education (CTE) (see Appendix A). Certain conditions for grant administration are also provided which include activities in the Fiscal Guidelines section of this document and the Uniform (UG) Guidance (2 CFR § 200). The duration of each assurance depends on the type of recipient, the specific assurance, and other conditions stipulated in the assurances.

Federal Program Monitoring and Local System of Accountability Overview

Perkins requires that eligible recipients be monitored to support the improvement of CTE programs of study. Eligible recipients should also establish accountability routines to assure continuous improvement for CTE programs at the local level. The DDOE and eligible recipient monitoring process focuses on six priorities:

1. Career pathways at the LEA level include Delaware CTE programs of study and program quality is ensured by an active program advisory committee;
2. CTE programs of study add value for students (technical skill attainment) and ensure students are able to transition into post-secondary education and a career;
3. All students have access to Delaware CTE programs of study as well as career and support services that facilitate a successful transition between the learning years (middle to high school and to post-secondary education);
4. Collaboration occurs amongst school faculty (school counselors, academic teachers, CTE teachers, and school administrators) to support a career and college ready culture and there are established professional learning experiences;
5. CTE program of study improvement is informed by student achievement, accurate data collection, and comprehensive data analysis (LEA, school, and program of study); and
6. Effective grant and fiscal management.

Eligible recipients and other entities receiving federal grants must also follow Uniform Grant (UG) Guidance (2 CFR § 200) rules for managing grant funds. The Uniform Guidance includes cost principles and general spending rules that apply to all federal grants.

Monitoring of Eligible Recipients

The DDOE CTE & STEM workgroup will conduct monitoring visits on a five-year rotation schedule or more frequently as needed. Each subsequent visit will assess the progress made from the previous
monitoring visit and address both quantitative and qualitative program measures. The monitoring form, sample interview questions, and draft agenda are provided to eligible recipients to help facilitate the monitoring process and support the continuous improvement of CTE programs of study in conjunction with Perkins (see Perkins Section 134) and Delaware Administrative Code [14 DE Admin. Code 525]. The DDOE will populate the initial monitoring form for each eligible recipient and the recipient will be asked to enter the required data, responses, and comments. The completed monitoring form will be submitted to the CTE & STEM Policy Advisor (see Appendix B) prior to the on-site monitoring visit.

Each section of the monitoring form contains an overarching statement with supporting strategies, references to data points, sources of acceptable evidence, and responses/comments to better understand the local system of CTE. Acceptable evidence should be compiled for the on-site monitoring visit as needed.

Eligible recipient staff are responsible for scheduling interviews during the on-site monitoring visit. Interview questions will be narrowed based on eligible recipient responses/comments from the monitoring form. If the eligible recipient would like to ask additional questions or highlight specific questions, the eligible recipient should provide the monitoring team with this information in advance of the on-site monitoring visit. Commendations, recommendations, and next steps will be collaboratively developed during the on-site visit.

Following the on-site visit, the DDOE CTE & STEM workgroup will collaborate with the eligible recipient staff to compile all data and complete the preliminary on-site monitoring report. A final monitoring report will be prepared that includes commendations, recommendations, and next steps. Commendations may include, but are not limited to, innovative practices and exemplary program models. Recommendations will include pervasive elements limiting the local system of CTE and may be addressed and included in the eligible recipient’s CGA (see Appendix A), as appropriate. Next steps will reflect issues that the eligible recipient must address to remain in compliance with Perkins. The timeline to address next steps will be agreed to by both the monitoring team and eligible recipient.

**Data Management for Eligible Recipients**

The DDOE will provide technical assistance to eligible recipients to improve the local system of CTE and create additional opportunities for students. LEA, school, and the program of study data reports are provided and include current and longitudinal student level performance data for CTE programs over a span of three (3) years. Reports are available through the Delaware EdInsight Dashboard, an online system that enables data-driven decision making. The EdInsight Dashboard can be accessed through the DDOE Identity Management System (see Appendix A). Eligible recipients are encouraged to contact the DDOE CTE & STEM Policy Advisor (see Appendix B) for technical assistance and to request access to view the CTE data reports.

**LEA Report**

The LEA data report will provide trend data (3 years) and current information on the overall performance of students enrolled in CTE courses in the aggregate, cluster, and school level. This report will provide an inventory of LEA, cluster, and school performance for each Perkins indicator and a
SECTION III – ACCOUNTABILITY POLICY

snapshot of other available student data. Further, the LEA report will include a demographic breakdown of students enrolled in CTE at the LEA, cluster, and school levels.

School Report
The school data report will provide trend data (3 years) and current information on the overall performance of students enrolled in CTE courses at the school and program of study levels. This report will provide an inventory of school and program of study performance for each Perkins indicator and a snapshot of other available student data. Further, the school report will include a demographic breakdown of students enrolled in CTE at the program of study and course levels.

Program of Study Report
The program of study report will provide trend data (3 years) and current information on the overall performance of students enrolled in CTE courses. This report will provide an inventory for each program of study and a snapshot of other available student data. Performance levels for each program of study will be benchmarked against all CTE programs in the school and LEA as well as all related programs of study and overall student performance at the cluster and state level. Further, the school report will include a demographic breakdown of students enrolled in the program of study and at the course levels.

These annual data reports should be used in the development of performance management routines to assure quality and progress toward established CTE goals and continuous program improvement. These routines should align structures and processes through a set of reinforcing activities that might include: the identification of clear outcomes, alignment of resources, collection and use of data, and clear accountability measures.

## Required Uses of Funds

Eligible recipients and institutions must first satisfy the Perkins required activities before applying expenses for permissive activities (see Perkins Section 135c); however, required activities may also be accomplished through other federal, state, or local funding sources. Below is a list of the nine (9) required use of funds, the corresponding funding description for the Consolidated Grant Application (CGA), and an explanation of the required use of funds.

<table>

| 9 | **Size:**  
- Include state-approved POS;  
- Provide opportunities for students to become POS completers; and  
- Identify and report a substantial number of CTE concentrators and POS completers each year.  
**Scope:**  
- Include rigorous, coherent CTE content aligned with challenging academic standards;  
- Provide opportunities for students to earn an industry-recognized credential, certificate, or license which holds value at the professional or post-secondary level;  
- Identify opportunities for students to participate in work-based learning activities; and  
- Connect secondary and post-secondary coursework.  
**Quality:**  
- Achieve performance targets established for Perkins core indicators;  
- Support special population students enrolled in CTE POS;  
- Incorporate industry-recognized standards; and  
- Demonstrate continuous program improvement. |
### APPENDIX D

**Permissive and Non-Permissive Uses of Funds**

A complete list of all permissive uses of funds can be found in [Perkins Section 135c](#). Below are examples of both permissive and non-permissive uses of Perkins funds. All funds allocated under Perkins should be used to support the development, implementation, and continuous improvement CTE Programs of Study (POS). Funding thresholds that reference the total percent of permissive Perkins funds that can be applied to a related expense are included. Expenses beyond the recommended threshold or cap will be discussed during the DDOE CGA process and the recipient will need to demonstrate how size, scope, and quality of the local plan will be maintained.
