Marketing Today Sample Budget

The following sample budget lists most of the allowable expenditures to implement the three (3) or six (6) credit Marketing Today. LEAs should use this form to help identify the equipment, supplies, software, textbooks, and professional development needed to implement the specific courses for the program of study. It is strongly recommended that the sample budget be used to develop the budget and budget narrative for the Innovation Grant.

The LEA should select only the items needed and delete rows that are not applicable. The total should be calculated based on the selected items and the indirect cost if requested. Funds may not be used for equipment, supplies, and consumables for courses within the program of study that were implemented in previous years.

The digital textbook and simulation is available online upon registration. The LEA should consult the Course Planning Tables to determine and finalize the budget and budget narrative. The cost of the Stukent 3-year curriculum license will be divided by the number of schools adopting the program. For example, if five (5) LEAs adopt the program, the cost will be \$1,440 to each LEA. Stukent will send an invoice directly to the LEA.

Stakent will send an involce directly to the LEA.
