Ensuring Confidentiality of Individual Student Data

The Delaware Department of Education is legally required to protect the confidentiality of data that could be used to identify individual students. Legal requirements for protecting the data are detailed in the Family Education Rights and Privacy Act (FERPA) (20 U.S.C. § 1232G; 34 CFR Part 99). FERPA requires that these data be protected to ensure they cannot be used to identify the attributes of any individual student. Beyond the natural barriers to precise identification, including differential time frames and net transfer effects, additional disclosure mitigation methods have been applied to these data to ensure confidentiality.

Executive Summary

The Delaware Department of Education (DDOE) report on graduation is from data collected annually. Delaware collects data from all public schools that include grade 12. Cohort graduation rates are calculated as prescribed by the National Center for Educational Statistics (NCES), which provides data to the federal reporting system. In accordance with NCES requirements, Delaware uses the four-year adjusted cohort graduation rate, which measures the number and percentage of cohort members who earned a regular high school diploma within four years or less. The cohort is defined as the number of first-time 9th graders followed for four years plus students who transfer in minus students who transfer out, emigrate or are deceased during that time period. The report also provides five-year and six-year graduation rates.

This report does not contain data reflecting private, parochial or home school students in Delaware. The State does gather information from families that home school their children as well as from private schools, but only does so to verify the transfer of a student from public to private and home schools.

Graduation Definitions:

- **Elementary and Secondary Education Act (ESEA) Four-Year Adjusted Graduation Rate:** The number of students who graduate in four years with a regular high school diploma divided by the number of students who form the adjusted cohort for the graduating class.
- **Cohort Adjustment:** The cohort is adjusted by adding any students transferring into the cohort and by subtracting any students who transfer out, emigrate to another country, or die during the years covered by that cohort's rate calculation.
- **Transfer Into:** A transfer into a cohort occurs when a student enrolls after the beginning of the entering cohort's first year in high school, up to and including in grade 12. A transfer in may be from another public school in Delaware, a nonpublic school in Delaware or a student transferring in from another state or country.
- **Transfer Out:** A transfer out of a cohort occurs when a student leaves a Delaware public school and enrolls in another public or nonpublic school within Delaware or out of state or in an educational program that culminates in the award of a regular high school diploma. Transfers out must have appropriate documentation; otherwise the student shall be considered a drop out.
- **Regular High School Diploma:** The standard high school diploma awarded to students that is fully aligned with the state's academic content standards and does not include a GED credential, Diploma of Alternate Achievement Standards, Certificate of Performance or any alternative award.
