Intent of the Model Cornerstone Assessments

Model Cornerstone Assessments (MCAs) in music assessment frameworks to be used by music teachers within their school's curriculum to measure student attainment of process components defined by performance standards in the National Core Music Standards. They focus on one or more Artistic Process (i.e., Creating, Performing, or Responding) and are designed as a series of curriculum-embedded assessment tasks, each of which measures students' ability to carry out one or more process components. The MCAs can be used as formative and summative indications of learning, but do not indicate the quality of teaching or effectiveness of a school's music program.

Although each MCA is designed so that it can be administered within an instructional sequence or unit, teachers may choose to spread the component parts of one MCA across multiple units or projects. Student work produced by the national pilot is available on the NAFME website that illustrates the level of achievement envisioned in the National Core Music Standards.

Using the MCA document

This MCA is meant for any ensemble. This document is available in a .pdf format with links for easy navigation within the document and to external links for .doc versions of worksheets. It is divided into student achievement levels but could be considered grade levels: **Novice** (5th/6th grade or an equivalent to 2 years of study in an ensemble in addition to general music); **Intermediate** (7th/8th grade or an equivalent to 4 years of study in an ensemble in addition to general music); **Proficient** (One or more years of high school study); **Accomplished** (Proficiency exceeding average performance proficiency for high school study); **Advanced** (Preparing for collegiate study in music).

General Description of the Assessment Task

Students will individually or collaboratively imagine, plan and make, evaluate and refine, and present music based on skills and knowledge learned in an ensemble setting. It is the intent of this MCA to begin with improvisation leading to composition and/or arranging with accommodations made for the amount of instructional time. Individual teachers can determine the length of time required to complete the assessment. Use the following links to find the National Standards [Skills and Knowledge](#) and the [Music Standards Glossary](#).

Model Cornerstone Assessment, Ensemble: Creating

Create Music for a Scenario

Imagine

Assessment Strategy 1

The teacher will:

- guide students to select a primary phrase discovered in one of their ensemble works.
- have students complete the assignment as indicated on the appropriate Imagine Worksheet.
- collect, score using the Imagine Scoring Device, and provide feedback for the Imagine Worksheets.

Plan and Make

Assessment Strategy 2

The teacher will:

- explain to the students that they will be creating a short music work. They may use instruments to help them with the process. If done in class, the teacher should constantly monitor the students (pairs for novice and intermediate levels), and use the praise, point, and leave strategy.

Collect, score, and provide feedback for the Plan and Make Worksheets using the Plan and Make Scoring Device. Then return to the students for use in refinement..

Evaluate and Refine

Assessment Strategy 3

To support student in refining their composition, teacher will:

- put students in groups of four independently or in class. Each student should perform the original, then perform their composition in progress with the other three providing feedback.
- The group of four students will review the final composition rubric and discuss how the compositions can reach meeting or exceeding standard.

Then the students will continue to compose, refining the composition with adjustments in response to the feedback and rubric discussion. The teacher will ask students to complete the Evaluate to Refine Worksheet, which will be turned in after the final performance.

Present/Perform

Assessment Strategy 4

The teacher will:

Score the students' presentation of their compositions where they do the following:

- perform the original version
- verbally explain the compositional device(s) used to implement and expressive intent,
- perform the music composition either live or prerecorded.

Imagine Worksheet – Novice

1. Select a motif (*brief rhythmic/melodic figure or pattern that recurs throughout a composition as a unifying element*) from one of the ensemble works that is appropriate for your performance medium. Independently explore four of the compositional devices from the table below. Explore each idea a sufficient number of times in order to choose which you like the best to re-imagine this phrase, then improvise a re-imagined version using one of the devices.
2. Using an improvisational/compositional tool (*musical instrument, staff paper, sequencer, recording device, etc.*) record (*using a digital recording device*) or notate (*using traditional or alternative notation*) the original phrase (*melodic/rhythmic*) as appropriate for your performance medium.
3. Then record (*using a digital recording device*) or notate (*using traditional or alternative notation*) the re-imagined motif (*melodic/rhythmic*) that you feel appropriately embellishes the original characteristics of the music/text.

Compositional Device Menu – Circle the device(s) used in your re-imagined phrase

Plan and Make Worksheet - Novice

Using your re-imagined motif, develop a eight-measure composition with a peer. One student will compose the opening four measures and the other will complete the final four. Before beginning to compose a melody, there are certain decisions a composer must make. After brainstorming with your partner and with your class, list the decisions you know you will have to make in the left-hand column of this chart. Then, with your partner, write the corresponding answer you have decided upon for each decision in the right-hand column. This chart uses Key Signature as an example. If you intend to use Key Signature as one of the decisions you intend to make, then list it again.

Differentiation Strategies

(Instructional approaches that respond to individual student needs and strengths to maximize student learning and success.)

Resource: (sample) <http://www.ascd.org/publications/books/100216/chapters/Understanding-Differentiated-Instruction@-Building-a-Foundation-for-Leadership.aspx>

pre-assess to determine levels of student prior knowledge and abilities.

determine and teach to reduce learning gaps.

create independent enrichment/enhanced work for students who show mastery.

group students to accommodate learning needs.

use provocative, complex questioning to stimulate high level thinking.

devise open-ended tasks to allow students of all ability levels to achieve success at their own levels.

tier tasks to address levels of abilities and support students within each tier.

assure that students are given choice in tasks in order to address their learning styles, interests, etc.

Extension Experience: Have students write in journals and/or essays reflecting on their composition experiences. Using the language of the Composition Rubric, they should include why their melody worked or didn't work, what they will do differently in their next compositions, and an assessment of their efforts on the project. A brief reminder of the Six-Trait Writing Model might be in order.
