HOW TO READ THIS PROGRAM REPORT

This program report contains six (6) domains: Recruitment, Candidate Performance, Employment and Placement, Retention, Graduate Performance and Perceptions. Each domain is comprised of two (2) to four (4) metrics.

A program must generate a score on at least one metric in the Graduate Performance domain in order to merit a program report. Delaware's program reports consider the past five years of program data. This program report includes data on candidates entering the program or graduating from the program between July 1, 2015 and June 30, 2020.

Program performance is displayed for each metric in the format to the right. The program data is displayed to the left of and above the bar. If the program scores below the minimum standard, it earns zero points for the metric. If it scores at or above the state target, it receives all the points for the metric. Within the established range, the program earns a proportional share of the points available.

LEGEND

- 1 This is the program's performance for the metric.
- 2 These numbers are the minimum threshold and state target for the metric. A program scoring below the minimum threshold earns zero points for the metric. If it scores at or above the state target, it receives all the points for the metric. Within this established range, the program earns a proportional share of the points.
- 3 These mark a range of possible performance on the metric (extreme range).
- 4 This marks the state's average for the metric for those students prepared in Delaware educator preparation programs.
- 5 This marks the national average for the metric (where available).

For more information regarding the minimum threshold and state target for metrics, as well as other metric details, business rules, and example calculations, see the [Technical Specification](#) manual.

PROGRAM DESCRIPTION

The Master of Education in Reading prepares teachers for certification as a Reading Specialist in grades K-12. Reading specialists must demonstrate the ability to produce high levels of student achievement in literacy. Literacy requires an understanding of reading and writing intertwined with the ability to interpret critically and apply new information to existing knowledge. Every school should have access to Reading Specialists who have specialized training related to addressing reading difficulties and who can give guidance to classroom teachers in language arts, writing, and content area reading.
